

SENIOR ENGINEER

Enovity, Inc. is a leading commissioning, energy engineering, sustainable design and facility management firm based in San Francisco, with offices in Irvine, Sacramento, Seattle and Phoenix.

We are currently seeking a highly motivated senior engineer for a full-time position. This candidate must have a solid background in HVAC engineering, DDC controls and energy efficiency strategies for large commercial buildings.

Responsibilities:

- Perform commissioning of new buildings and retro-commissioning of existing buildings, energy assessments and writing technical reports for commercial facilities
- Write commissioning plans and field reports for new construction projects and perform hands-on testing of HVAC and control systems in existing buildings
- Assist with LEED assessments for a variety of buildings
- Write technical reports and administration of project responsibilities

Education and Qualifications:

- Degree in Mechanical, Electrical or Civil Engineering
- California Professional Engineering license (P.E.) preferred
- Five or more years experience in the energy efficiency or HVAC industry

Skills:

- Ability to successfully meet completion of projects on time and within budget
- Ability to provide ongoing quality assurance
- Excellent communication, interpersonal, and problem solving skills
- The capability to fully author clear and concise technical reports
- Motivation and ability to work independently and as part of a team.
- A background in energy efficiency and/or HVAC industries (design and construction) is required

Experience:

- Experience with field assessments and troubleshooting of HVAC systems for large commercial buildings including central CHW and HW plants and built up air handlers
- Ability to read and understand architectural and MEP drawings and specifications
- Experience with building automation systems (BAS) and Direct Digital Control (DDC)
- Relevant technical hands on experience in building systems commissioning, retro-commissioning, design and commissioning of digital HVAC controls systems
- HVAC design experience
- Construction administration/management of HVAC and electrical projects
- Familiarity with computer modeling of building energy performance using DOE-2, Energy Pro, eQuest, Trane Trace
