

PROJECT MANAGER: ENERGY SERVICES

Enovity, Inc. is a dynamic, growing, full-service energy engineering, sustainable design, and facility management firm based in San Francisco, with offices in Irvine, Los Angeles, San Diego, Sacramento, Seattle, and Phoenix.

Enovity is currently seeking a highly motivated Project Manager to lead and manage energy efficiency projects. Energy efficiency services can save facilities thousands in energy costs annually by “tuning-up” a building: identifying and correcting problems in lighting and HVAC systems, central plant, domestic hot water, process equipment and building controls.

Responsibilities:

- Lead and manage retrocommissioning projects.
- Identify and prioritize energy and operational improvements based on expected savings, implementation cost, constructability, and likelihood of acceptance.
- Develop concept designs for HVAC, controls, lighting, and other energy efficiency projects.
- Consult on energy-efficient and sustainable designs.
- Responsible for the technical quality, accuracy and managerial aspects of multiple projects.
- Responsible for personal and subordinate time management for those projects.
- Planning for project activities and keeping accurate records of project activities.
- Technical report writing and editing.
- Client management and communication.
- Communication with other Enovity staff including Principals, Project Managers, Engineers, and Administration Staff.
- Project invoicing and other project responsibilities.

Education and Qualifications:

- BS or MS in Mechanical Engineering
- California-Licensed Professional Mechanical Engineer (PE) preferred

Experience:

- Seven to 10 years of project management experience in design and/or construction, commissioning of existing buildings, with at least five of those years in team leadership or management role.
- Expert in forensic evaluation of HVAC systems, controls, and energy evaluations of energy retrofits, including energy savings calculations.
- At least one year experience of utility energy incentive program management that includes energy savings calculations and/or fleet reporting.
- Proven track record of delivering on large-scale projects.
- Experience overseeing all aspects of the project, including planning, resource allocation, and budget.
- Strong communication skills, including analytical, technical writing, team building, collaboration and problem solving.
- Ability to multi-task and work on many projects at the same time.

- Proven leadership ability.
